Alipurduar, West Bengal

SUMMARY

JavaScript Developer with 1+ year of hands-on experience building cross-platform mobile apps with React Native, and practical experience developing full-stack web applications using the MERN stack (MongoDB, Express, React, Node.js). Experience with TypeScript, object-oriented programming (OOP), SOLID principles and API design. Passionate about clean code and performance optimization.

PROFESSIONAL SKILLS

- **Frontend / Mobile:** React, React Native, Expo, TypeScript, JavaScript, Tailwind CSS, Redux
- **Backend / Full-Stack:** Node.js, Express.js, ORM, MongoDB, PostgreSQL REST APIs, WebSocket, JWT / Authentication, CRUD operations, Database Modeling
- **Tools & Version Control:** Git, GitHub, Docker
- **Soft Skills:** Time Management, Adaptability, Communication Skills, Collaboration / Teamwork

WORK EXPERIENCE

FRONTEND DEVELOPER

(January 2025 - Present)

Technopride Softwares

- Designed and developed responsive, cross-platform mobile and web applications using React, React Native, TypeScript and JavaScript.
- Built and integrated RESTful APIs for dynamic data handling and real-time updates.
- Styled and optimized UI with Tailwind CSS, ensuring accessibility and adherence to modern design principles.
- Conducted testing, debugging, and performance optimization to improve app stability and load times.
- Collaborated with designers and backend developers to align on functionality, performance, and user experience.
- Used Git & GitHub for version control and efficient team collaboration.

PROJECTS

PROPASSIST APP

React Native | TypeScript | NativeWind | REST API

- Created a cross-platform mobile app to simplify society management tasks such as maintenance tracking, complaint registration, and guard touring.
- Built intuitive, responsive UI screens using React Native and Tailwind CSS, ensuring seamless usability across Android and iOS devices.
- Enhanced app performance through lazy loading, code optimization, and component reusability.

NUBIE.JS (PERSONAL PROJECT)

[Project Docs](#)

TypeScript | Node.js | Express.js | Runtime Reflection & Decorators | Dependency Injection

- Engineered a decorator-driven WebAPI framework on Express.js inspired by .NET architecture.
- Used reflection and decorators to enable metadata-based routing and middleware.
- Implemented automatic dependency resolution to streamline service injection and reduce boilerplate.
- Established a scalable, modular backend architecture that improves maintainability.

YOUTUBE-LIKE BACKEND APP (PERSONAL PROJECT)

(Video Sharing App)

Node.js | TypeScript | Nubie.js | MongoDB | REST APIs

- Constructed a video streaming backend with features for user registration, video upload, and video retrieval.
- Implemented JWT-based authentication to secure user access and protect API endpoints.
- Leveraged MongoDB for efficient storage and retrieval of video metadata and user data.

EDUCATION AND CERTIFICATION

SELF-LEARNING THROUGH ONLINE RESOURCES

YouTube, Docs, StackOverflow etc
