Alipurduar, West Bengal, India

SUMMARY

JavaScript and TypeScript developer with 1+ year of hands-on experience building cross-platform mobile applications using React Native and developing full-stack web applications with the MERN stack. Strong understanding of OOP principles, SOLID design, RESTful API design, authentication, and performance optimization. Passionate about writing clean, scalable code and delivering high-quality user experiences.

PROFESSIONAL SKILLS

- Frontend & Mobile:** React, React Native, Expo, TypeScript, JavaScript, Redux
- Backend:** Node.js, Express.js, MongoDB, PostgreSQL, REST APIs, WebSocket, Database Modeling
- Tools & Version Control:** Git, GitHub, Docker
- Architecture & Concepts:** Object-Oriented Programming (OOP), SOLID, Clean Architecture
- Soft Skills:** Time Management, Adaptability, Communication Skills, Collaboration / Teamwork

WORK EXPERIENCE

FRONTEND DEVELOPER

(January 2025 - Present)

Technopride Softwares

- Designed and developed responsive, cross-platform mobile and web applications using React, React Native, TypeScript and JavaScript.
- Built and integrated RESTful APIs for dynamic data handling and real-time updates.
- Styled and optimized UI with Tailwind CSS, ensuring accessibility and adherence to modern design principles.
- Conducted testing, debugging, and performance optimization to improve app stability and load times.
- Collaborated with designers and backend developers to align on functionality, performance, and user experience.
- Used Git & GitHub for version control and efficient team collaboration.

PROJECTS

PROPASSIST (TECHNOPRIDE SOFTWARES)

React Native / TypeScript / NativeWind / REST API

- Created a cross-platform mobile app to simplify society management tasks such as maintenance tracking, complaint registration, and guard touring.
- Built intuitive, responsive UI screens using React Native and Tailwind CSS, ensuring seamless usability across Android and iOS devices.
- Enhanced app performance through lazy loading, code optimization, and component reusability.

VIDEO STREAMING BACKEND (PERSONAL)

Node.js / TypeScript / Nubie.js / MongoDB / REST APIs

- Constructed a backend system supporting user authentication, video upload, compression, metadata management, and secure content access.
- Designed and optimized MongoDB schemas for efficient storage and retrieval of video metadata, user data, and access permissions.
- Integrated FFmpeg for video compression to reduce video size by ~20-30%, optimizing storage usage and bandwidth consumption.
- Implemented role-based access control (RBAC) to secure APIs and restrict video access.

NUBIE.JS (PERSONAL)

TypeScript / Node.js / Express.js / Runtime Reflection & Decorators / Dependency Injection

- Architected a custom backend framework inspired by .NET, enabling decorator-driven controllers, routing, and middleware execution.
- Implemented runtime reflection and metadata processing, reducing route configuration code by ~40% compared to standard Express setups.
- Abstracted Express internals to allow framework extensibility for logging, validation, and authentication modules.
- Created a modular, layered architecture aligned with SOLID principles, enabling faster feature development and code isolation.

EDUCATION AND CERTIFICATION

SELF-LEARNING & CONTINUOUS DEVELOPMENT

- Actively learning through YouTube, Google Docs, Stack Overflow, and official documentation.
- Focus areas: System design basics, backend architecture, and performance optimization.
